DO NOT BRING		
Mobile phones		
Electronics		iPods / games / kindles etc
Knives		

Check your labels!

The saying goes that there is no such thing as the wrong weather, only the wrong kit!
The biggest problem in the outdoors is often keeping warm, particularly when damp or wet. Some types of material are good for this (polyester and other synthetics) and others are poor (e.g. cotton). Jeans, heavyweight cotton jogging bottoms etc. should not be used at camp or on activities. Fleece, synthetic tops etc. are all cheap, commonly available alternatives that perform far better outdoors.
Conversely, man made fibres should be avoided when around fires / naked flames. When packing, think about the planned activities and what the best clothing is for all scenarios.
If in doubt, check with your section leader.

Notes

1. All items to be indelibly marked with the young person's name
2. Ensure all kit fits correctly. Especially footwear and rucksack straps.
3. Any medication should be passed to a leader on arrival, in a clear bag, named and containing clear instructions on doses etc.
4. Ensure OSM details are correct with contact numbers present.
5. Ensure leader is aware of any allergies / medical conditions
6. Scouts should pack their own bags with adult supervision so they know what their own kit looks like and where to find things!
